# INTRODUCTION TO *MACH* WAX

MACH - is a highly scientific, technical compound that re-aligns the structure of the wax atom by bonding MACH to Hydro-Carbon. With this bonding of MACH additive, KUU MACH Series Waxes are a very strong & stable compound that provides properties exceptionally superior to conventional wax compounds, including:

- Less sensitive to snow crystals
- Faster glide
- Increased water repellency on your base
- Longer wax durability
- Added base protection
- Faster transitional time to top acceleration speed
- Less snow temperature sensitivity
- Prevents base burn
- Continuous base lubricity

- It is not recommended to use any other wax in combination with KUU MACH Waxes and doing so may negatively affect the MACH advantage.
- We highly recommend that competitors start with the MACH Level Waxes as their regular everyday wax and as their training wax. They are exceptional Speed & Glide waxes at a price point affordable for everyone. Also the MACH Level is both an excellent base wax and will strongly impregnate and replenish the base.
- MACH II or MACH III Level Waxes (including all pastes, sprays, and powders), whose formulae have the best affinity for the MACH, create the best performance combination possible for speed and competition. Developed for racers under racing conditions.

**KUU's MACH Wax series is a progressive performance series, each wax complementing and enhancing the others active properties for optimal speed.**

K208C	White Lightning Paste Wax - Fluorinated	- 80g
K208CN	White Lightning Paste Wax - Fluorinated	- 40g

**High Fluoro Block Bar - Rub On**  
 High concentration of KF Fluoro polymer for easy application.  
 For general use: Either rub-on, then cork or hot iron onto base.  
 For competition: Rub-on as base layer then hot wax with a performance wax.

**K209C - Fluorinated 100% Powder Enhancer 1.7oz.**  
 Just cork in over the wax-of-the-day with KUU's high density cork with felt (K120CF).

**K209CNTNT TNT FLURO - Go Faster Longer!**  
 - Super low weight micro molecule has even longer Base staying Power.  
**For Ski, Snowboard and Nordic Application**

**White Lightning Paste Waxes**  
 This fluorinated formula combines wax longevity and ultimate performance. Our formula is a blend of our best synthetic, H-C waxes and fluoro-silicon additives. Choose it for its ease of application, strong penetration and excellent base coverage.  
 Universal temperature range.

**BASE CLEANER / NETTOYEUR DE BASE**

## KJU Bio Citron Wax Remover

KJU Bio Citron Wax Remover is a non-hazardous (but do NOT try drinking it) biodegradable solvent for the removal of old dirt, grime, grease, klisters and other "stuff" that accumulates on bases. Biocitron Wax Remover is manufactured using a patented distillation process of citrus based fruits. It is both low in VOC and is non-chlorinated. It contains no hazardous MEK, Hexane, Heptane, Isopropyl Alcohol, Methanol or Acetone.

KJU Bio Citron is the preferred alternative for most wax removers and base cleaners, many of which contain blends of MEK, Acetone or III Trichloroethane.

KJU Bio Citron Wax Remover leaves a clean, residue free surface, has a pleasant citrus scent and has a relatively rapid drying time.

It is highly recommended in shop environments where responsible and environmentally friendly alternatives for solvents are being sought by shop technicians and it is excellent for general consumer use (x-country skiers, downhill skiers and snowboarders).

KJU Bio Citron is available in 4oz, 8oz spray mist bottles with P.O.P, and in tuning shop bulk sizes of 1 and 4 litre cans.

### BIO CITRON BASE CLEANER

- K122C1 Bio Citron Base Cleaner - 112ml / 4oz
- K122C Bio Citron Base Cleaner - 227ml / 8oz
- K508W1 Bio Citron Base Cleaner - 1 litre
- K508W4 Bio Citron Base Cleaner - 4 litre

Patented, safe, citrus distilled product that does not leave a residue on the base and does not dry out the base.

# VISES / ÉTAU

DISPLAY BOX

V001

## V001 - KJU VISE PRESIDENT

- High-tensile aluminum body.
- Light and easy to transport.
- Rubber blocks (included) to be placed in the vise to allow a ski to be placed sideways to allow for edge tuning.
- For tuning all types and shapes of alpine skis, nordic skis and snowboards.
- Special rubber to grip the ski during side and base work.

V002

Shown on the KJU TABLE2 Tuning Horse (not included)

## V002 - KJU SIDE KICK VISE

- Two piece design.
- High-tensile aluminum body.
- Light and easy to transport.
- Adjustable height and pivot to allow for a more ergonomic position while edge sharpening.
- Works with most benches and supports.
- For tuning all types and shapes of alpine and nordic skis.
- Special rubber to grip the ski during side and base work.
- Screws to hold the ski securely on edge.
- Can be used with ART625 to accommodate nordic skis.

V003

Shown on the KJU TABLE2 Tuning Horse (not included)

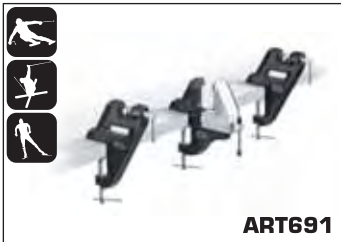

## V003 - KJU PRO RACE VISE

- Three piece (centre opens to 110mm).
- High-tensile aluminum body.
- Light and easy to transport.
- Adjustable height and pivot to allow for a more ergonomic position while edge sharpening.
- Sidewall contact: 60mm.
- For tuning all types and shapes of alpine and nordic skis.
- Special rubber to grip the ski during side and base work.
- Screws to hold the ski securely on edge.
- Can be used with ART625 to accommodate nordic skis.

## VISES / ÉTAU

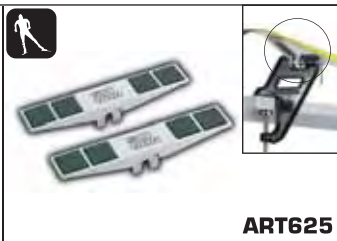

- ART691 - SkiMan TRIO VISE**
- Jaw width: 30 mm: Jaw opening 38 to 85 mm.
  - High-tensile aluminum body.
  - Light and easy to transport.
  - For tuning all types and shapes of alpine and nordic skis.
  - Also used with ART625 (not included) for nordic skis.

- ART1110W - SkiMan PRO WIDE**
- Jaw width: 90 mm: Jaw opening to 150 mm.
  - High-tensile aluminum body.
  - Light and easy to transport.
  - For tuning all types and shapes of alpine and nordic skis.
  - Also used with ART625 (not included) for nordic skis.

- ART670 - SkiMan CROSS COUNTRY**
- High-tensile aluminum body.
  - Light and easy to transport.
  - For tuning all types and shapes of nordic skis.
  - used with ART625 (included) for nordic skis.

- ART1021 - SkiMan SUPER PRO**
- Shop vise for tuning all types and shapes of alpine skis, nordic skis and snowboards.
- ART625 - SkiMan NORDIC SUPPORT**
- Additional support for ART691, 1110W, V002 & V003.

## TUNING TABLES / TABLES DE MISE AU POINT

- TABLE1 - TUNING / WAXING TABLE**
- Size = L120cm x W40cm x H76cm
  - Weight = 25 lbs
  - Steel construction.
  - Folds for easy transport.
  - Great platform for the KJU Vise President ski and snowboard vise (V001).
  - Great for waxing and tuning.

- TABLE2 - TUNING HORSE**
- Size (folded) = L100cm x W9cm x H6cm
  - Weight = 9.9 lbs
  - Steel construction.
  - At less than 10lbs the 'Tuning Horse' is the perfect waxing and tuning companion.
  - Perfect for travelling and great for on-hill use.
  - Includes carry bag.

- TABLE3 - THE BULLDOG TUNING TABLE**
- Size = L120cm x W45cm x H90cm
  - Weight = 48 lbs
  - Heavy duty steel construction.
  - Extension arms to accommodate longer skis.
  - Folds for easy transport.
  - Strong enough for mounting and adjusting bindings.

# SIDE EDGE SHARPENERS / OUTILS D'AFFÛTAGE DE CARRES

**K100C**  
Ice Buster 90°

**K101C**  
Ice Buster 88°

- K100C / K101C - Ice Buster 90° or 88°**
- Aluminum construction.
  - Side edge sharpener
  - Precision hand tool has a 10 year guarantee against breakage.
  - Steel file has two cuts for edge removal and tuning.
  - Replacement file (K102C) sold separately.

**K102C**  
Ice Buster file

**K099C - Pocket Sharpener 88° or 90°**  
- Economical combo 88° and 90° angle side edge sharpener with file.

89/88/87/86

## COMBO SHARP

0.5/1

**ART5006 - COMBO SHARP Multi Edge Sharpener**  
- Economical combo side (89/88/87/86°) and base (0.5°/1°) sharpener with file in one tool.

**ART4003 - QUATTRO Diamond Edge Sharpener**  
- 87°/88°/89°/ 90° angle side edge sharpener with diamond file.  
- To deburr and polish edges. Best used with water.

**ART4001 - QUATTRO Edge Sharpener**  
- 87°/88°/89°/ 90° angle side edge sharpener.  
- TRIZACT stone to clean the edge before filing and polish after.  
- Steel file to tune edge.

# SIDE EDGE SHARPENERS / OUTILS D'AFFÛTAGE DE CARRES

- For Alpine, Super Side Cut & Snowboard

ART3071  
Adjustable  
0.5° to 1.5°

### ART3071 - ADJUSTABLE BASE SHARP

- Adjustable at 0.5°, 1° and 1.5°.
- Aluminum design.
- Easy handling and steady grip for maximum accuracy.
- Fits files, stones or diamonds up to 6mm thick.
- For skis and snowboards.

# TUNING PRODUCTS / PRODUITS POUR MISE AU POINT

### ART3004 - SIDEWALL SHARP

- Ergonomic sidewall planer.
- Adjustable blade position and cutting depth.
- Right and left hand use.
- For ski and snowboard.

### ART5005 - PRO SIDEWALL SHARP

- Aluminum design.
- Ergonomic sidewall planer.
- Bearing system for smooth, precise control.
- Adjustable blade position and cutting depth.
- Right and left hand use.
- For ski and snowboard.

### ART5120 - SPARE TITANIUM BIT.

- Square
- Fits both ART3004 and ART5005.

### ART5130 - SPARE TITANIUM BIT.

- Round
- Fits both ART3004 and ART5005.

### K571W - CHROME FILE 6" (150mm) 15tpcm

- Chrome treated for performance and durability.
- Made in Portugal.

### K570W - CURVED TOOTH 12"

- For the removal of steel and sidewall material.

### K572W - CHROME FILE 8" (200mm) 17tpcm

- Chrome treated for performance and durability.
- Made in Portugal.

### K570W1 - CURVED TOOTH 4.75"

- For the removal of steel and sidewall material.
- Can be used with edge bevel guide.

### K573W - CHROME FILE 10" (250mm) 20tpcm

- Chrome treated for performance and durability.
- Made in Portugal.

### K570W2 - CURVED TOOTH 4.75"

- For the removal of steel and sidewall material.
- Can be used with edge bevel guide.

### K575W - PRO-CHROME FILE 8" (200mm) 12tpcm

- Chrome treated for performance and durability.
- Made in Portugal.

### K581W - TEAM TOOLS CHROME FILE 6" (150mm) 15tpcm

- Chrome treated for performance and durability.
- Made in Portugal.

### K582W - TEAM TOOLS CHROME FILE 8" (200mm) 17tpcm

- Chrome treated for performance and durability.
- Made in Portugal.

### K111C - PRO-FILE 15tpcm

- 8" chrome file with 0.5° base bevel sleeve,
- Ideal for maintaining base bevel.
- Made in Portugal.

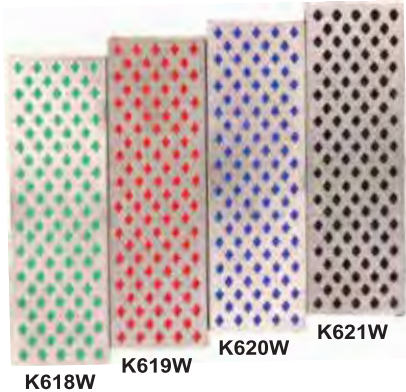

## TUNING PRODUCTS / PRODUITS POUR MISE AU POINT

### KUU DIAMOND STONES

- Long lasting.
- More diamonds per square inch.
- Comes with a protective pouch.

# ROTO BRUSHES / BROSSES ROTATIVES

## KUU ROTO BRUSHES FOR SKIS AND BOARDS

- Large diameter brushes mean fast surface speeds = less R.P.M. (suggested range 700 - 2,300rpm), allowing any drill to be used.
- Do criss-cross and diamond patterns without the drill or handle getting in the way.
- Avoid touching the base during diagonal passes.
- All brushes are washable with hot water.

K627W1

K627W140

K627W7

K627W2

K627W9

K627W4

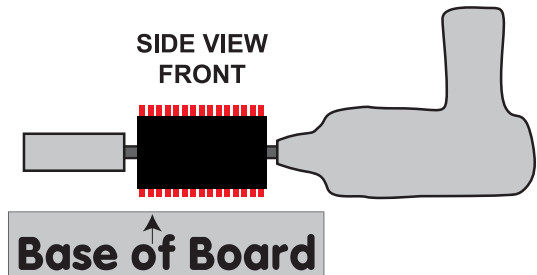

K627W10

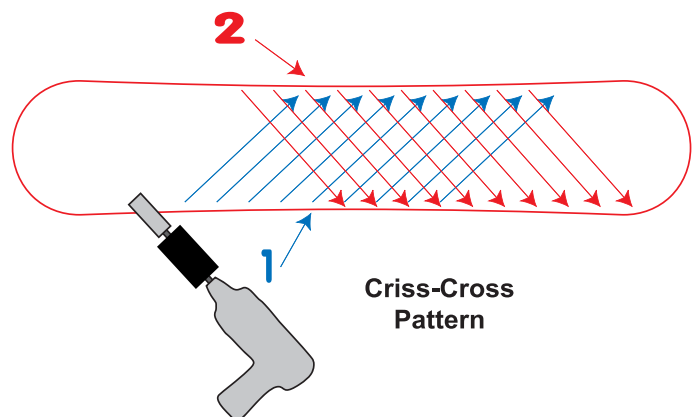

K627W6

K627W11

Handle or drill can be used upside down or sideways!

- K627W1
- K627W140
- K627W2
- K627W4
- K627W6
- K627W7
- K627W9
- K627W10
- K627W11

- Roto Brush Handle with detachable cover and removable 100mm hex shaft.
- Extra Long Roto Brush Handle shaft - For brushes between 100 and 140mm wide.
- NYLON Roto Brush - SOFT (after waxing/scraping, finishing, fine structure & KF fluoro).
- NYLON Roto Brush - UNIVERSAL (opens & cleans pours of base, general finishing).
- BRASS Roto Brush (structure base, criss cross/diamond/straight pattern, cleans base of dirt & old waxes). Use @ 700 r.p.m.
- NATURAL CORK (for applying fluoro cake, powder fluoro & Kf fluoro waxes).
- Drum with hooks for Tex-Pad (K627W11).
- HORSEHAIR Roto Brush (opens structure after scraping).
- Tex-Pad - For use with K627W9 (Use prior to waxing to remove base hair, to clean, and produce a fast glide structure).

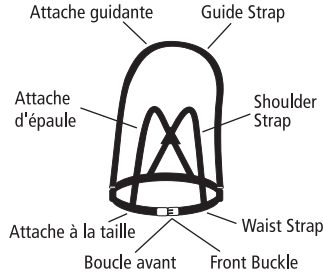

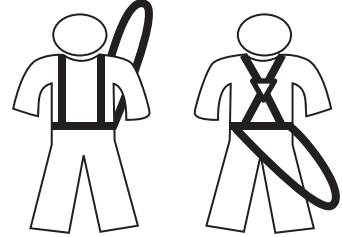

# HARNESSES SETS, TIP STRAP, HATS & CAPS / ENSEMBLE DE HARNAIS, COURRDIE POUR SPATULES, CHAPEAUX & CASQUETTES

## K126H2 KIDS SKI HARNESS SET

Gives kids the confidence to learn to ski and unwrap themselves from around your legs. Builds independence, control, and provides a sense of security. Includes a free Tip Strap.

## K126H2 Front/Avant Back/Arrière

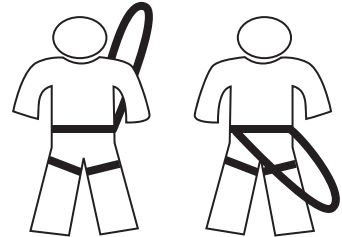

## K126H3 KIDS WAIST SKI HARNESS

- Harness controlled around the waist & upper leg for better control.
- Safe & easy way to teach your child the basics.
- More control for the parent.
- Better control of the centre of gravity.

## K126H3 Front/Avant Back/Arrière

## K126H TIP STRAP

For those learning to ski  
- Keeps the ski tips together, forming a "pizza" for better control on the slopes.

## BELTS - NORTON INNOVATIVE TECHNOLOGY

### NORTON PERFORMANCE ABRASIVES - CERAMIC (SG) AND NORZON (NZ)

Norton Company's Ceramic (SG) coated abrasives are an alternative for premium grinding applications. With Ceramic (SG) and Norzon (Zirconia Aluminum) product offerings, Norton has two premium grains which offer two alternatives for hard-to-grind applications.

Ceramic (SG) and Norzon (NZ) are complementary products in the Norton Company family of Abrasives. Each has its distinctive characteristics and the two grains share some properties such as cooler grinding than Aluminum Oxide (AO). To get a clear idea for how the two relate, it is appropriate to compare and contrast these two grains. The crystal structures of these two grains are different. Norzon exhibits controlled fracture during grinding. NZ abrasive grains have striations or parallel fracture planes. When these planes fracture within the individual abrasive particles, they form smaller, sharper cutting edges. Ceramic abrasive does not have controlled fracture planes. As Ceramic breaks down during grinding, it resharpens itself into a keen point, yielding a sharp, relief-like cutting edge.
